Suggested FOU Plan

Feb. 12/22.

time	from	to	Notes
2122			Discussion on FOU plan w Wallace, Bernier, Springer and Edwards.
			Footprint: Wellington from Bay to the west to Elgin to the east to Albert to the south.
	Bernier		So what I have asked for is a Core hardening plan for the area south of Albert.
	Wallace		We have to keep in mind the sustainability but we have enough resources for the existing footprint.
	Bernier		My concern is that the zone south of Albert becomes the "festive zone"
	Wallace		Let's contain the footprint, w messaging of fines, losing licence / CVOR, not depriving them of anything - shelters and places for food - a lot of those people are going to nearby Hotels @ night. the footprint is manageable in

			my opinion from POL side of things.
	Bernier		So this becomes an exclusion zone? no one goes in unless they ^{can prove} have business there right?
	Wallace		that's right the footprint is not residential
	Bernier		would have to do a full son assessment to make sure but I believe it's only businesses
	Wallace		even people in the footprint I don't think would be upset we are trying to control it. will do recki - we know when weekend crowds clear we are dealing w 200-300 people. that is really manageable once we have it locked down the rotation of people on traffic points will be alot easier. In our POL opinion this is doable and it's doable this week.

time	from	to	Note
	Bernier		Legal wants to see a plan they may have to come down to see the plan and advise on it.
	Wallace		everyday we delay this will run us on a weekend where there is more people - we want to do this on a weekday.
	Bernier		Where does this fall into the PLT plan?
	Wallace		PLT will keep messaging they will change the messaging as needed. we are 72 hours away from doing this anyhow. what I would ask of you is permission to work on this plan will get the legal piece as we move forward. If we delay much longer we will be into another weekend of this.
	Bernier		asking Springer - This plan is part of the target long term plan we are

	Springer		talking about anyways with our folks @ the NOC. Yes, it fits in - Darwin is aware.	
	Wallace		Yes, I have made Darwin aware of this.	
	Bernier		to Springer - Is it worth while to have them keep building this plan?	
	Springer		Yes as you need to have a Contingency Plan here.	
	Wallace		this is not a contingency plan - this should be the main plan. I look at this from a standpoint of sustainability moving forward - for teams - this footprint can be handled by 3 sections.	
	Bernier		Have to think a little bigger than this and don't quite aligning with main action plan right now because it has to do with the negotiations aspect of it	

It may not be something you want to implement

	Bernier		what I'm concerned about, the focal point of Ottawa and what we do here, once we do this we may create a bigger problem.
	Wallace		IF we do this, decide on this we can have this done on the weekend. [Keep in mind, this
	Bernier		is an integrated thing - This is a discussion with PLT on how this is all going to fit in.]
	Wallace		For the NBC this is the new piece of the main plan. Darwin is the one saying legally, with his experience, we can make this happen.
	Bernier		What Jurisdiction?
	Wallace		Will have Darwin here
	Bernier		Keep in mind - I have been asked to go speak to the

Darwin

	Wallace		PLT - For reassurance and to give them my 100% support. What Wallace is proposing may go against what they are wanting to do - So I have to be careful here No, I get that negotiators are the eternal optimists and the hard fact side are the ones that say we need to take action.
	Springer		They know how we build these events and they have to understand that this is in the works - They can talk about consequences, they can talk about compression, they can do all the messaging building into that if we need, if we are doing it this week. I don't think we can get there from here - would be a 9-10 days from this point to build it properly

			unless Wallace is saying we can do it with 3 sections - will see what you come back with your assessment. Cause you know this street (slater) is jammed with trucks.
	Wallace		Yes. If they come in and try to challenge this they will have to come through their own trucks.
	Springer		Yeah they are down to Somerset
	Edwards		Will go with you guys - would like to walk this (pointing at larger footprint down to Somerset) and get a feel for it.
	Bernier		You definitely have my attention just so you know this is somewhat aligning at some point we will have to do something like this. (I appreciate what you are saying about ^{the} sustainability piece but right now this is a bigger bigger monster

<u>time</u>	<u>from</u>	<u>to</u>	<u>notes</u>
	Walker		We have been looking at this for 2 weeks - we have listened to all the solutions that have been proposed and we were the originators of a lot of them, and from the poll commanders that have been here for 2 weeks this is your solution. Will get you the closest and the fastest to a resolution to this incident. The other alternative that have been proposed - and we were on board with - you are looking at another 2-3 weeks of trying to get this back. This concept would move us forward and take care of a lot of sustainability issues that we will have if the expectation is going 3 more weeks.
	Bernier		from what I would imagine, unless we have a Core Hardening

<u>time</u>	<u>from</u>	<u>to</u>	<u>Notes</u>
			Where we would not allow anyone in the Core while this is going on. and the reality is that plan was put in place that we will be doing a full intervention going in and cleaning. We are left with trucks but hardening the whole Core and no one going in except if you can prove you live down there. In other words implementing curfew and all that stuff. That would need to be put in place in order for this to happen. This, if we put in place, and Friday/Saturday rolls around next weekend it will get out of control down from Albert to Somerset - where I don't think we will be able to hold that line. I disagree
	Wallace Bernier		Well no because you will be in the real public order - will get people from the back
	Wallace		Here is where I will challenge you - we have to go based with previous

experience with this group and what Intell is telling us. Intell has said right from the beginning this isn't a hard core group that's going to come up and fight police. We've seen that happen when we took the gas, even then all they did was try to stand up in front of the trucks and when we started moving trucks they just kind of parted sea. We are watching it @ Ambassador (bridge in Windsor) I don't even think they have made an arrest yet. I think there is a danger in underestimating these people but I also think we are getting into a bit of a paralysis by overestimating them. We have to go on evidence based on what we have seen so far and what the Intell is, and I would say today on what I have seen they are losing momentum. Who cares we will bring in every PCU teams for the weekend

			Upon reviewing all the info I have concerns w the approach give all the other independent elements surrounding the Wellington Core. (Bridgman / Sussex) (Freeman and of the land @ Bay) (Bank / Metcalf) I believe that we need to take a more holistic approach to our final solution. At this point this plan can be explored further but no approval at this point.
